

8 ways

to give your business the IT flexibility it needs with Lanit Cloud Services

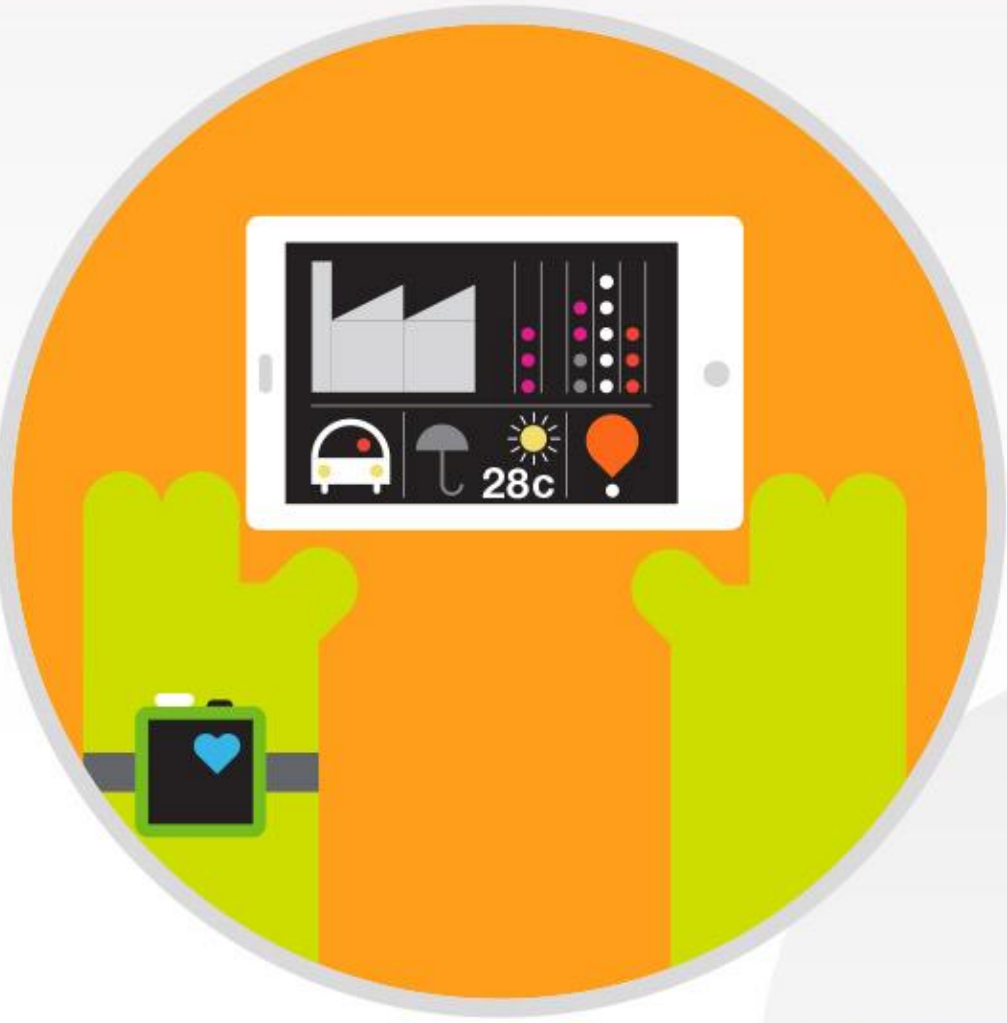

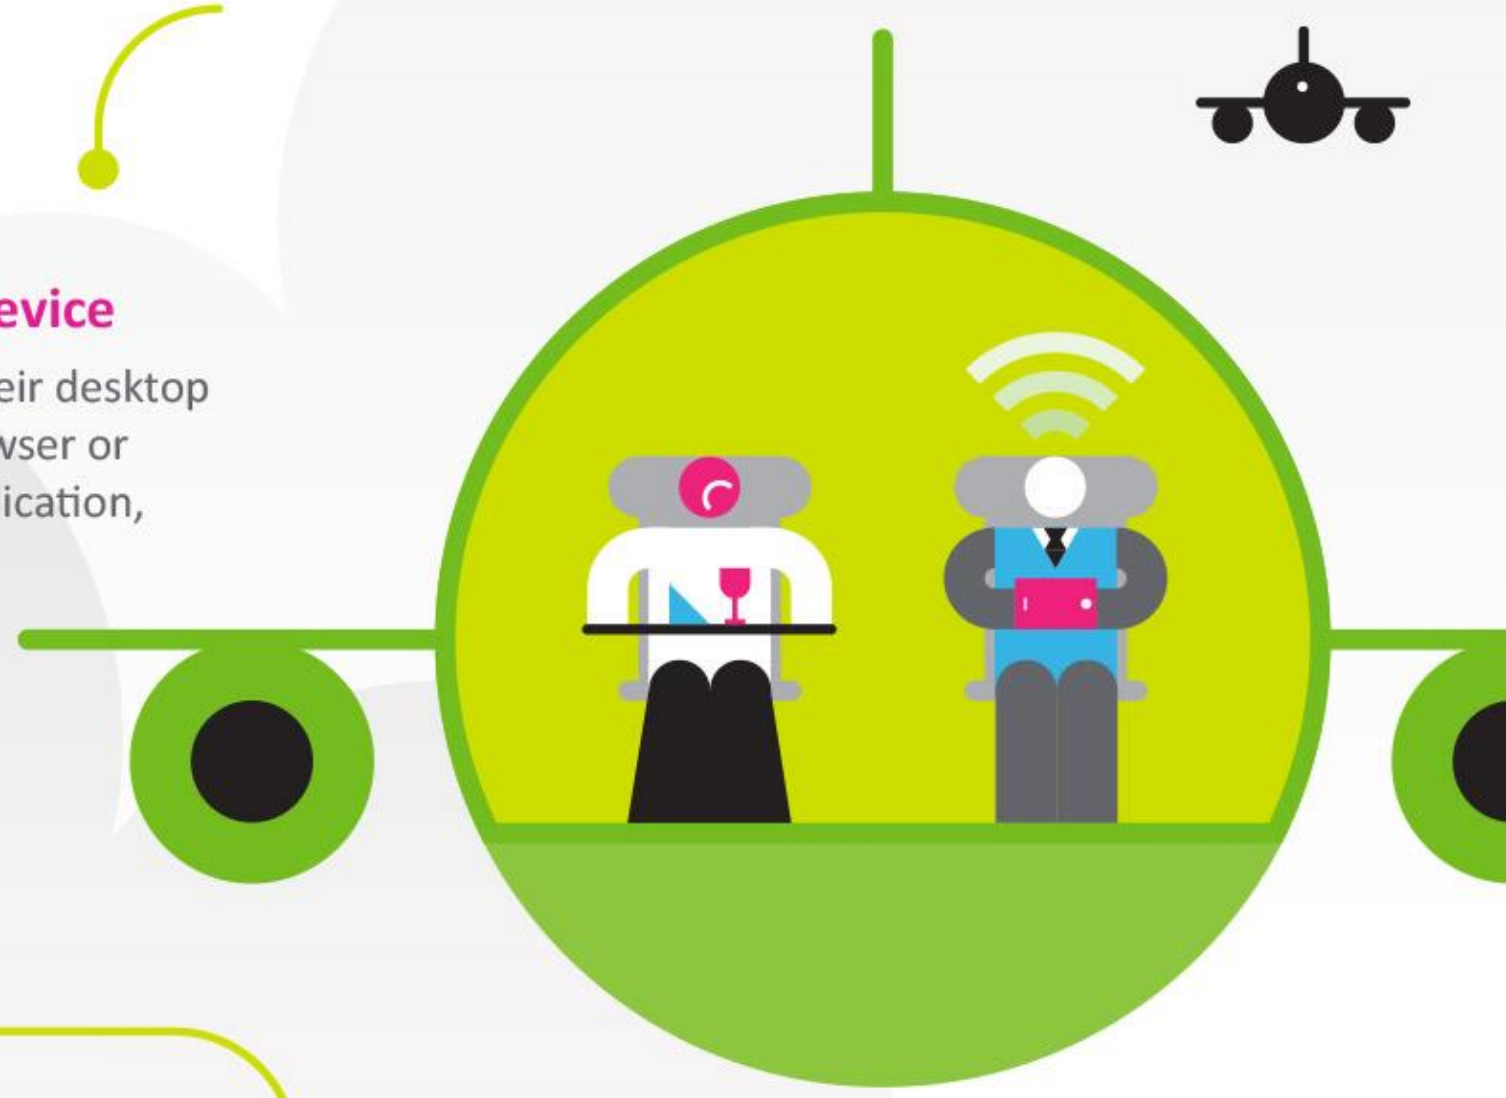

To meet increasing customer demands, your organization could benefit by moving to an always-connected workplace. We offer an extensive range of virtual desktop solutions that provide your employees with seamless, secure access to all of the apps and data they need to get their job done. Here's just a few reasons why you should work with us.

- 1. Enable cost-effective IT**
 Let us handle the day-to-day details. You stay focused on your business. Better yet, we'll deliver your apps and desktops globally from the cloud and eliminate the capital expenses of maintaining your own datacenter.

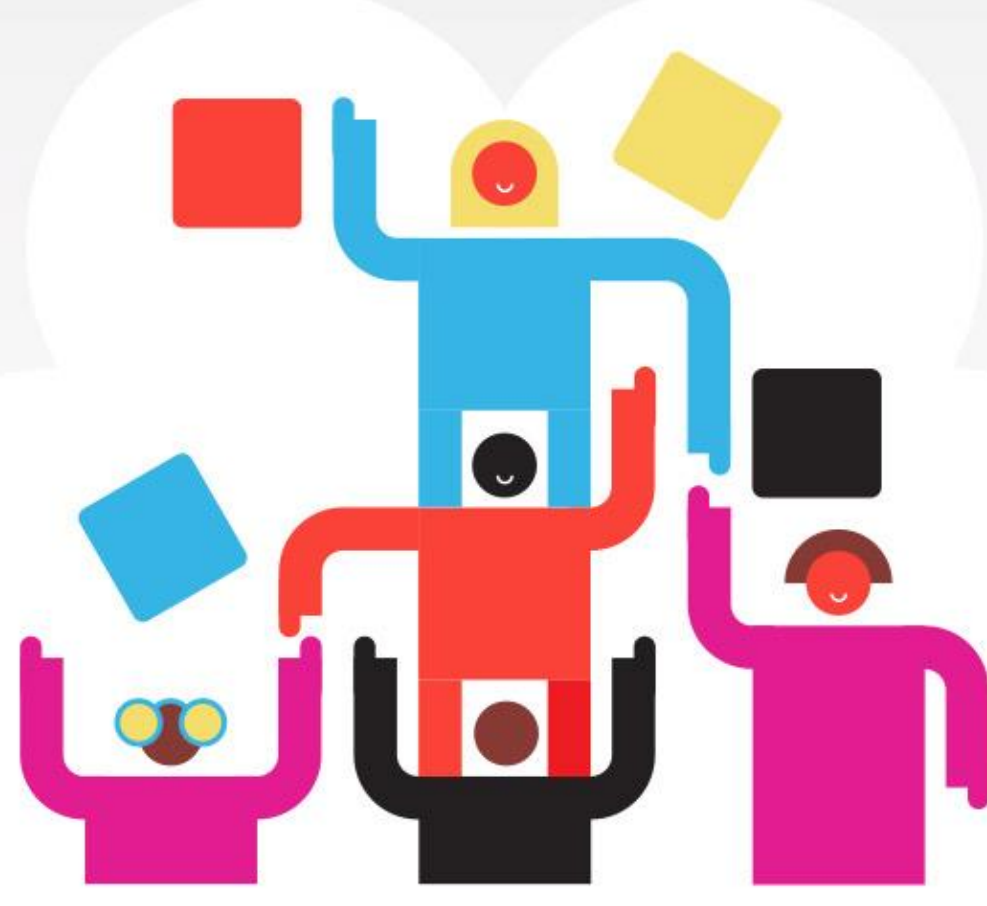

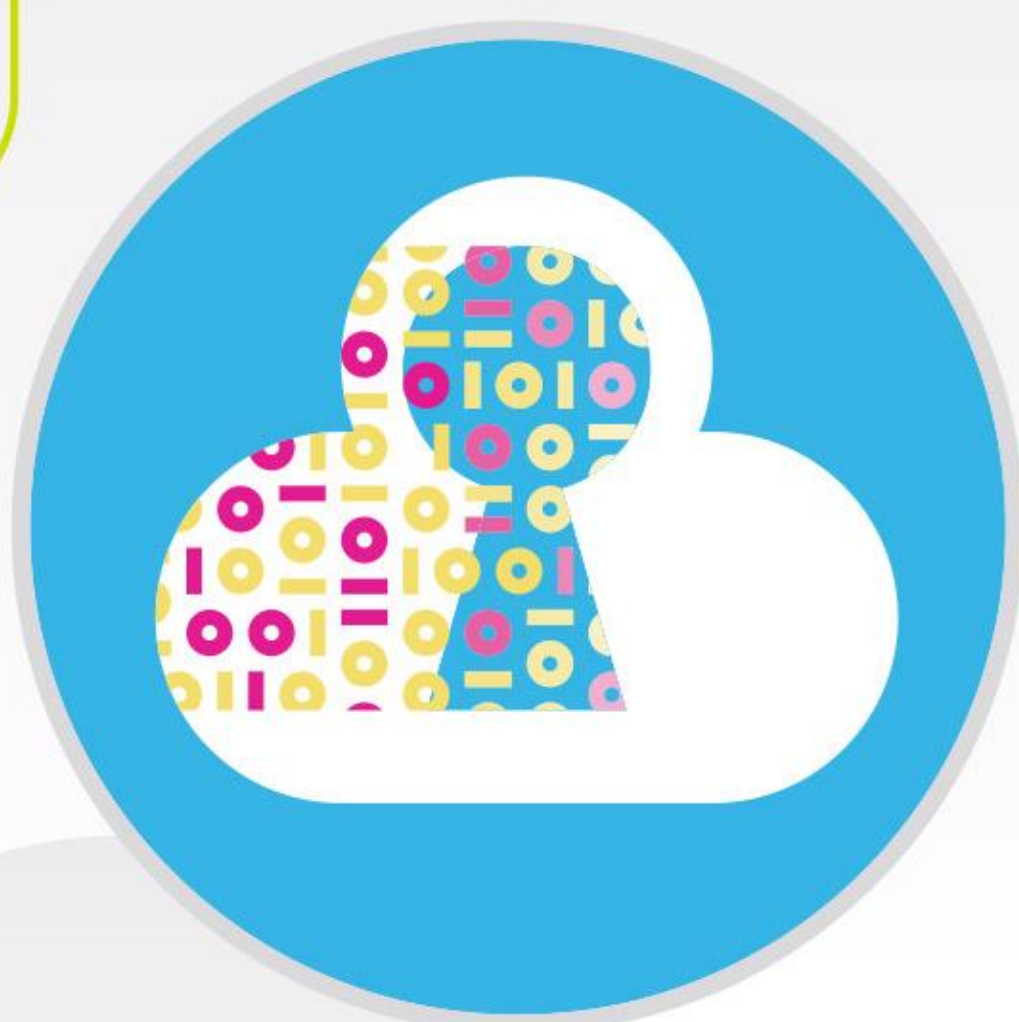

- 2. Provide desktops to remote or temp employees**
 Need fast onboarding? We can rapidly provision Windows apps and desktops for remote contractors or seasonal workers and easily shut them down when not in use.

- 3. Access work from any device**
 Your employees can access their desktop from any HTML5-capable browser or via a small downloadable application, enabling them to work on an iPad, tablet, Chromebook, laptop, desktop or thin client—whatever device they prefer.

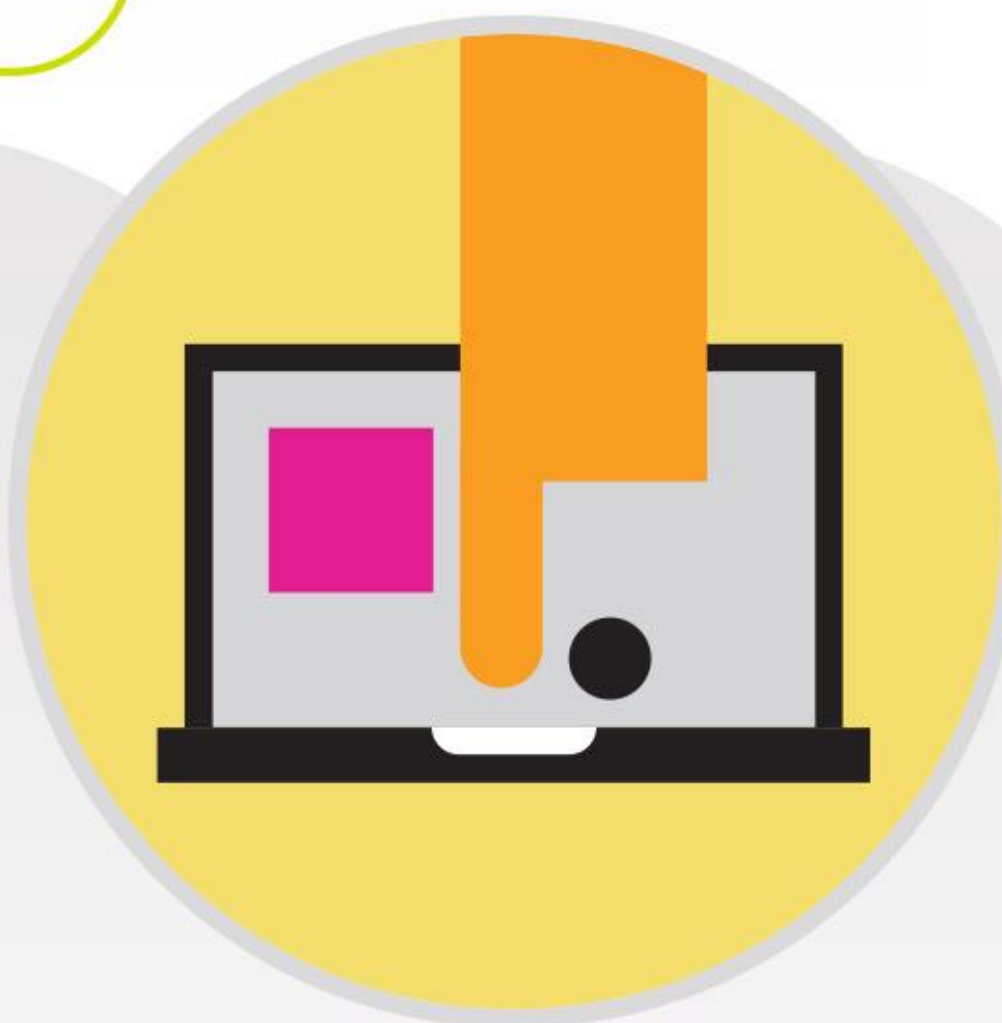

- 4. Deliver great user experiences**
 Employees will enjoy a high-definition experience at work, home or anywhere else they do business. Using our services, you can deliver graphic-intensive applications or intelligent desktop workspaces side by side, giving your people the right capabilities for the right occasion.

- 5. Improve security and compliance**
 With desktops delivered virtually, you can eliminate any concerns about data loss or theft because your sensitive information is stored in the cloud, not on the device.

- 6. Enable business continuity during unexpected events**
 During sudden disruptions or emergency situations, we can scale up desktops in minutes without the additional CapEx expenses and, if needed, even support a completely remote workforce.

- 7. Centralize and simplify IT services**
 No more in-house IT fire drills and unexpected expenses. We can seamlessly manage everything your team needs. From desktop provisioning to contextual access control to IT help desk support, we've got you covered.

- 8. Enhance Microsoft capabilities for greater productivity**
 As a Citrix Service Provider Partner, we can bring additional value to your Microsoft solutions. From modernizing desktop environments to providing valuable productivity tools to boosting performance and security, we can deliver the apps and tools your employees need to get the job done.
